SUMMARY

- Aspiring iOS Developer focused on building clean, modern SwiftUI interfaces and learning end-to-end app development. Strong foundation in Swift, UI design principles, and component-driven development. Actively building real iOS projects to develop production-ready skills. Seeking an internship or junior role to grow under experienced engineers.

SKILLS

iOS Development

- Swift, SwiftUI
- MVVM Architecture
- SwiftData/ CoreData (Learning)
- UIKit (Basic Understanding)
- XCode
- Git & GitHub

Additional Technical Skills

- Firebase (Auth + Firestore basics)
- HTML/CSS/JS (intermediate + CSS framework: TailwindCSS)

PROJECTS

Swift Verse (SwiftUI App)

A beginner-friendly anime/manga viewing app built fully in SwiftUI.

Feature:

- Displays categorized anime lists using local JSON models
- Custom card components, grid layout, and detail screens
- Smooth animations and transitions

Tech Used: SwiftUI, MVVM, Custom Components

What I Learned: Data modeling, view structuring, reusable UI patterns

FruitShop UI (SwiftUI Design Showcase)

A visually rich home screen concept for a fruit-shopping app.

Feature:

- Modern card-based layout
- Hero sections, gradients, and custom shapes
- Smooth animations and transitions
- Multi-section scrolling experience

Tech Used: SwiftUI, ViewModifiers, Custom Animations

What I Learned: Advanced UI composition, layout tuning, color theory in apps

JokesAPart (Ongoing project)

It is a full application which has the integration of Firebase for the login system. It generates jokes on user call by API calling and parsing.

EDUCATION

Dhole Patil College of Engineering — 3rd Year (8.60 SGPA)
Army Public School, Kanpur 10th: 87% | 12th:67%

ADDITIONAL PROJECT EXPERIENCE (NON-iOS)

- Built small ML apps using Python (NumPy, Pandas, PyTorch basics)
- Developed full-stack websites using HTML, CSS, JS, Flask, MongoDB
- Created UI-heavy React/Tailwind projects
- Made a PDF NLP app using Flask + HuggingFace
